

Paper Chain STEM Challenge

Challenge:

Using a single piece of paper, make the longest chain possible in the given amount of time.

Materials:

- One Piece of Construction Paper
- Scissors
- Tape

Instructions:

Using only the materials provided, work by yourself or with a group to make the longest paper chain.

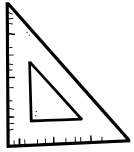

You can only use one sheet of paper, so take your time and plan your paper chain carefully.

You have **10** minutes to complete the chain.

When your time is up, lay the paper chains next to one another to determine the longest paper chain.

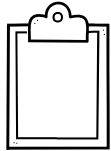

Extend the Activity: Measure each paper chain. Put each paper chain end to end. Measure the total length of all of the chains.

Paper Chain STEM Challenge

Measure

How long is your paper chain?
